## EXPERIENCE

### Onclick Consultants - Senior Software Developer April 2019 - Current Nairobi - Kenya

- Designed Introduction to computer studies & fundamentals curriculum where I have been remotely teaching via [google classroom](#) youths in my local home on basics of computer use during the COVID19 pandemic currently I have 7 active learners in the platform.
- Delivered two fully functional [Learning Management Systems](#) for both our clients [METIS](#) and [Teach For Kenya](#) that was transitioning from in-person learning and training of its fellows to a virtual platform, with our solution both the trainers and fellows were able to engage, complete tasks, read and upload digital resources as well as keep accurate track of their progress.
- Developed a fully functional E-commerce Management System and Delivery Management System for [Sadiq Solutions Ltd.](#)
- Collaborated with internal teams to improve & maintain high levels of client satisfaction especially during the unforeseen COVID-19 pandemic uncertainty, implemented a 24/7 rotational remote structure availing client support service all-round the clock achieving high levels of client satisfaction and not only preserving existing accounts but also closing 27 new portfolios within 3 months into the pandemic.
- Provided coding assignments and tutorials for my team and reviewed code workflow for neatness & readability, accuracy and functionality.
- Analyzed code segments regularly delegating & spearheading iteration & improvement tasks to the internal team.

### ALX Launchpad - I.T Communication Team Lead January 2019 - March 2019 Nairobi - Kenya.

- Designed & developed a weekly mailChimp campaign highlighting week's schedules, announcements, new opportunities to over 120 Young Leaders every week within 2 weeks that ran for 6 months continuously.
- Was part of the team that designed and built the ALX website for resources & information sharing keeping up with all the updates and sharing new opportunities & resources to over 120 Young Leaders within 1 month maintaining & managing the platform as a vital collaboration tool for the entire duration of the programme spanning over six months.
- Designed a peer-peer feedback delivery model for the young leaders for use during peer-group workshops & trainings.
- Collaborated with marketing professionals to produce copy for advertisements or articles.

### Kenyatta National Hospital - ICT Intern November 2017 - February 2018 Nairobi - Kenya.

- Was responsible for setting up the computer network in the hospital. This was meant to ensure that network is operating properly and that all the employees have the ability to communicate through the internet and hospital intranet.
- Provided technical support to computer users in the hospital. This included install new software, repairing hardware problems, installing new hardware, troubleshooting problems and training employees on how to use new software programs.
- Maintained and managed the hospital website by assisting Full Stack in designing the layout of the website, write the programming code and test the site for its usability.
